

Medical Policy:

Cinqair® (reslizumab) intravenous infusion

POLICY NUMBER	LAST REVIEW	ORIGIN DATE
MG.MM.PH.228	March 22, 2024	2019

Medical Guideline Disclaimer Property of EmblemHealth. All rights reserved.

The treating physician or primary care provider must submit to EmblemHealth, or ConnectiCare, as applicable (hereinafter jointly referred to as “EmblemHealth”), the clinical evidence that the member meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request preauthorization or post-payment review. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. This clinical policy is not intended to pre-empt the judgment of the reviewing medical director or dictate to health care providers how to practice medicine. Health care providers are expected to exercise their medical judgment in rendering appropriate care. Health care providers are expected to exercise their medical judgment in rendering appropriate care.

EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary.

If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. Identification of selected brand names of devices, tests and procedures in a medical coverage policy is for reference only and is not an endorsement of any one device, test or procedure over another. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication.

EmblemHealth may also use tools developed by third parties, such as the MCG™ Care Guidelines, to assist us in administering health benefits. The MCG™ Care Guidelines are intended to be used in connection with the independent professional medical judgment of a qualified health care provider and do not constitute the practice of medicine or medical advice. EmblemHealth Services Company, LLC, has adopted this policy in providing management, administrative and other services to EmblemHealth Plan, Inc., EmblemHealth Insurance Company, EmblemHealth Services Company, LLC, and Health Insurance Plan of Greater New York (HIP) related to health benefit plans offered by these entities. ConnectiCare, an EmblemHealth company, has also adopted this policy. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

Definitions

Cinqair, an interleukin-5 antagonist monoclonal antibody, is indicated for severe asthma as add-on maintenance treatment of patients ≥ 18 years of age who have an eosinophilic phenotype. Limitations of Use: Cinqair is not indicated for the treatment of other eosinophilic conditions or for the relief of acute bronchospasm/status asthmaticus.

Length of Authorization

Initial- 6 months

Continuation- 12 months

Dosing Limits [Medical Benefit]

Approve 3 mg/kg administered intravenously once every 4 weeks.

Max Units (per dose and over time) [HCPCS Unit]:

- 345 billable units every 4 weeks

Guideline

1. **Asthma.** Approve Cinqair for the duration noted if the patient meets one of the following conditions (A or B):
 - A. **Initial Therapy.** Approve for 6 months if the patient meets the following criteria (i, ii, iii, iv, and v):
 - i. Patient is ≥ 18 years of age; **AND**
 - ii. Patient has a blood eosinophil count ≥ 400 cells per microliter within the previous 4 weeks or within 4 weeks prior to treatment with Cinqair or another monoclonal antibody therapy that may lower blood eosinophil levels; **AND**
Note: Examples of monoclonal antibody therapies that may lower blood eosinophil levels include Cinqair, Adbry (tralokinumab-ldrm subcutaneous injection), Dupixent (dupilumab subcutaneous injection), Fasenra (benralizumab subcutaneous injection), Nucala (mepolizumab subcutaneous injection), Tezspire (tezepelumab-ekko subcutaneous injection), and Xolair (omalizumab subcutaneous injection).
 - iii. Patient has received at least 3 consecutive months of combination therapy with BOTH of the following (a and b):
 - a. An inhaled corticosteroid; **AND**
 - b. At least one additional asthma controller or asthma maintenance medication; **AND**
Note: Examples of additional asthma controller or asthma maintenance medications are inhaled long-acting beta₂-agonists, inhaled long-acting muscarinic antagonists, leukotriene receptor antagonists, and monoclonal antibody therapies (e.g., Cinqair, Dupixent, Fasenra, Nucala, Tezspire, Xolair). Use of a combination inhaler containing both an inhaled corticosteroid and additional asthma controller/maintenance medication(s) would fulfil the requirement for both criteria a and b.
 - iv. Patient has asthma that is uncontrolled or was uncontrolled at baseline as defined by ONE of the following (a, b, c, d, or e):
Note: "Baseline" is defined as prior to receiving Cinqair or another monoclonal antibody therapy for asthma. Examples of monoclonal antibody therapies for asthma include Cinqair, Dupixent, Fasenra, Nucala, Tezspire, and Xolair.
 - a. Patient experienced two or more asthma exacerbations requiring treatment with systemic corticosteroids in the previous year; **OR**
 - b. Patient experienced one or more asthma exacerbation(s) requiring a hospitalization, an emergency department visit, or an urgent care visit in the previous year; **OR**
 - c. Patient has a forced expiratory volume in 1 second (FEV₁) $< 80\%$ predicted; **OR**
 - d. Patient has an FEV₁/forced vital capacity (FVC) < 0.80 ; **OR**
 - e. Patient has asthma that worsens upon tapering of oral (systemic) corticosteroid therapy; **AND**
 - v. The medication is prescribed by or in consultation with an allergist, immunologist, or pulmonologist.
 - B. **Patient is Currently Receiving Cinqair.** Approve for 1 year if the patient meets the following criteria (i, ii, and iii):
 - i. Patient has already received at least 6 months of therapy with Cinqair; **AND**
Note: A patient who has received < 6 months of therapy or who is restarting therapy with Cinqair should be considered under criterion 1A (Asthma, Initial Therapy).
 - ii. Patient continues to receive therapy with one inhaled corticosteroid or one inhaled corticosteroid-containing combination; **AND**
 - iii. Patient has responded to therapy as determined by the prescriber.
Note: Examples of a response to Cinqair therapy are decreased asthma exacerbations; decreased asthma symptoms; decreased hospitalizations, emergency department, urgent care, or medical clinic visits due to asthma; and decreased requirement for oral corticosteroid therapy.

Conditions Not Recommended for Approval

Coverage of Cinqair is not recommended in the following situations:

1. Concurrent use of Cinqair with another Monoclonal Antibody Therapy (i.e., Fasenra, Nucala, Dupixent, Tezspire, Xolair, or Adbry)
2. Eosinophilic Esophagitis or Eosinophilic Gastroenteritis

- 3. Hypereosinophilic Syndrome
- 4. Nasal Polyps

Applicable Procedure Codes

Code	Description
J2786	Injection, reslizumab, 1 mg

Applicable NDCs

Code	Description
59310-0610-31	Cinqair 10mg/mL Solution
59310-0610-33	Cinqair 10mg/mL Solution

ICD-10 Diagnoses

Code	Description
J45.50	Severe persistent asthma, uncomplicated
J45.909	Unspecified asthma, uncomplicated
J45.998	Other asthma

Revision History

Company(ies)	DATE	REVISION
EmblemHealth & ConnectiCare	3/22/2024	Annual Review: Updated dosing limits, updated J codes, added J45.5 and J45.998
EmblemHealth & ConnectiCare	04/10/2023	Transfer from CCUM Template to CoBranded medical template Retired MG.MM.PH.137
EmblemHealth & ConnectiCare	03/22/2023	Annual Revision: Conditions not recommended for approval: Criteria were updated to clarify that use of Cinqair with another monoclonal antibody therapy is specific to Fasenna, Nucala, Dupixent, Tezspire, Xolair, and Adbry.
EmblemHealth & ConnectiCare	07/20/2022	<p>Asthma: Criteria for a blood eosinophil level ≥ 150 cells per microliter within the previous 6 weeks or within 6 weeks prior to any anti-interleukin-5 therapy was changed to prior to any treatment with Cinqair or another monoclonal antibody therapy that may lower blood eosinophil levels. Throughout criteria, updated notes to include examples of monoclonal antibody therapies to include Dupixent (dupilumab subcutaneous injection), Tezspire (tezepelumab-ekko subcutaneous injection), Adbry (tralokinumab-ldrm subcutaneous injection), and Xolair® (omalizumab subcutaneous injection). Criteria requiring the patient to have experienced one or more asthma exacerbation(s) requiring a hospitalization, or an emergency department visit in the previous year, were updated to include an urgent care visit as well.</p> <p>Conditions Not Recommended for Approval: Criteria were updated to recommend against use of Cinqair with another monoclonal antibody therapy. Previously, criteria listed anti-interleukin monoclonal antibody therapies and Xolair separately.</p>

EmblemHealth & ConnectiCare	03/16/2021	Annual Revision: no criteria changes
